

# Doctorate of Business Administration (DBA) by Research & Publication

# Riviera – Overview

Riviera is a private higher education institution officially registered with the French national education administration. Riviera specializes in doctoral and postgraduate programs, with a strong emphasis on research, scientific publication, and international academic recognition.

Riviera supports doctoral candidates at every stage of their academic journey—from the development of their research projects to the publication of scholarly articles—ensuring global visibility and academic impact through its integrated research and academic publishing house.

# Doctorate of Business Administration (DBA) by Research & Publication

## ABOUT THE DBA

*The Doctorate of Business Administration (DBA) is a high-level professional doctorate focused on applied research in management and business sciences.*

*The DBA by publication offered by Riviera follows a practical and innovative academic model:*

- *Each doctoral candidate develops an original research project.*
- *Production and publication of three (3) scientific articles per year.*
- *Support from the research and publishing house and academic partnerships facilitates the publication process and ensures the candidate is recognized as a researcher on platforms such as Google Scholar and ResearchGate.*

## PROGRAM PARTICIPANTS

**This program is designed for :**

- Professionals, senior executives, managers, and consultants looking to enhance their expertise with a high-level academic title.
- Entrepreneurs who want to structure their professional practice through research.
- Master's degree (any discipline) holders aiming for academic, strategic, or leadership-oriented career development.

# Modules & Academic Supervision

---

- ✓ **Program structure:** One workshop every two months, fully oriented toward producing and publishing the three articles.
- ✓ **Main topics:**
  - Research methodology
  - Scientific writing and publication
  - Quantitative and qualitative research methods
  - Data analysis
  - Management, strategy, leadership, and innovation
- ✓ **Supervision:** Each doctoral candidate is assigned a dedicated academic supervisor, guiding them through all stages of the research project.
